Preface

The Eighth International Workshop on Applied Parallel Computing (PARA 2006) was held in Umeå, Sweden, June 18–21, 2006. The workshop was organized by the High Performance Computing Center North (HPC2N) and the Department of Computing Science at Umeå University. The general theme for PARA 2006 was “State of the Art in Scientific and Parallel Computing.” Topics covered at PARA 2006 included basic algorithms and software for scientific, parallel and grid computing, tools and environments for developing high-performance computing applications, as well as a broad spectrum of applications from science and engineering.

The workshop included 7 plenary keynote presentations, 15 invited minisymposia organized in 30 sessions, and 16 sessions of contributed talks. The minisymposia and the contributed talks were held in five to six parallel sessions. The main workshop program was preceded by two half-day tutorials. In total, 205 presentations were held at PARA 2006, by speakers representing 28 countries. Extended abstracts for all presentations were made available at the PARA 2006 Web site (www.hpc2n.umu.se/para06).

The reviewing process was performed in two stages for evaluation of originality, appropriateness, and significance. In the first stage, extended abstracts were reviewed for selection of contributions to be presented at the workshop. In the second stage the full papers submitted after the workshop were reviewed. In total, 120 papers were selected for publication in this peer-reviewed post-conference proceedings.

A number of people contributed in different regards to the organization and the accomplishment of PARA 2006. First of all the Local Organization Committee did a greatly appreciated and enthusiastic job. We also acknowledge the following people for the assistance and support during the workshop days: Yvonne Löwstedt and Anne-Lie Persson; Niklas Edmundsson, Roger Oscarsson, and Mattias Wadenstein. A special thanks goes to the PARA 2006 secretary, Lena Hellman, to Anders Backman and Björn Torkelsson for designing and managing the PARA 2006 Web site including the electronic paper submission system, powered by Commence, and to Mats Nylén and Mikael Rännar for their professional assistance in compiling and editing the PARA 2006 program, the booklet of extended abstracts, and the final proceedings. PARA 2006 would not have been possible without the personal involvement of all these fine people. We also greatly acknowledge all minisymposia organizers, the review coordinators and all the referees for their evaluations in the second review stage, which included several rounds and resulted in these professionally peer-reviewed post-workshop proceedings. Finally, we would also like to thank the sponsoring institutions for their generous financial support.

Since 1996 the international PARA conferences have become biennial and are organized by one of the Nordic countries. The three first workshops including PARA 1996 and the last PARA 2004 were held in Lyngby, Denmark. The other three, besides this one, were held in Umeå, Sweden (PARA 1998), in Bergen, Norway (PARA 2000), and in Espoo, Finland (PARA 2002). The PARA 2008 workshop will take place in Trondheim, Norway, May 13–16, 2008.

March 2007

Bo Kågström
Erik Elmroth
Jack Dongarra
Jerzy Wasniewski

In Memoriam and Dedication

Every day we are reminded of the perishables of life and that our individual lives are only a gift for a finite time. Unfortunately, at PARA 2006 this was no exception. Our colleague Amelia De Vivo, Università degli Studi della Basilicata, Italy, passed away during the conference on June 21, 2006 in Umeå, Sweden. Another of our colleagues, Olav Beckmann, Imperial College London, UK died on November 9, 2006; this workshop was the last professional engagement of his career. As a token of our friendship and admiration of Amelia De Vivo and Olav Beckmann, we dedicate the PARA 2006 conference proceedings to them, from all PARA 2006 participants and with our regards to their families.

Organization

PARA 2006 was organized by the High Performance Computing Center North (HPC2N) and the Department of Computing Science at Umeå University.

Organization and Program Committee

Bo Kågström	Umeå University and HPC2N, Sweden <i>PARA 2006 Chairman</i>
Erik Elmroth	Umeå University and HPC2N, Sweden <i>PARA 2006 Coordinator</i>
Jack Dongarra	University of Tennessee and Oak Ridge National Laboratory, USA
Jerzy Wasniewski	Technical University of Denmark

Local Organization Committee

Anders Backman	Daniel Kressner
Erik Elmroth (Coordinator)	Mats Nylén
Lena Hellman (Secretary)	Mikael Rännar
Bo Kågström (Chairman)	Björn Torkelsson

Review Coordinators

Peter Arbenz	Aatto Laaksonen
Siegfried Benkner	Claude Lacoursière
Ann-Charlotte Berglund-Sonnhammer	Julien Langou
Xing Cai	Hans Petter Langtangen
Raimondas Ciegis	Mats G. Larson
Zlatko Drmac	Osni Marques
Anne C. Elster	Lars Nordström
Michael Grønager	Frederik Orellana
Fred Gustavson	Kjell Rönmark
Sverker Holmgren	Jennifer Scott
Mats Holmström	Sameer Shende
Paul Kelly	Oxana Smirnova
Christoph Kessler	Hans Stockinger
David Kincaid	Jerzy Wasniewski
Sinisa Krajnovic	Jan Westerholm
Daniel Kressner	Felix Wolf
	Anders Ynnerman

Sponsoring Institutions

The Swedish Research Council (VR) via the Swedish National Infrastructure for Computing (SNIC).

Umeå University via the Vice-Chancellor, the High Performance Computing Center North (HPC2N), and the Department of Computing Science.

PARA 2006 Tutorials

Python in High-Performance Computing

Organizers and Lecturers: *Xing Cai*, *Hans Petter Langtangen*, and *Kent-Andre Mardal*, Simula Research Laboratory and Oslo University, Norway

Introduction to Object-Oriented Modeling and Simulation with Modelica

Organizers and Lecturers: *Peter Fritzson* and *Anders Sandahl*, Linköping University, Sweden

PARA 2006 Keynote Presentations

Implementing Advanced Force Fields for Simulation of Physical and Biological Processes

Tom Darden, National Institute of Environmental Health Science, North Carolina, USA

The Future of LAPACK and ScaLAPACK

James Demmel, University of California, Berkeley, USA

Supercomputers and Clusters and Grids, Oh My!

Jack Dongarra, University of Tennessee, Knoxville and Oak Ridge National Laboratory, USA

Large-Scale Ill-Posed Problems and Applications

Per Christian Hansen, Technical University of Denmark, Lyngby, Denmark

Mixed-Language Programming for HPC Applications

Hans Petter Langtangen, Simula Research Laboratory and Oslo University, Norway

Parallel MATLAB

Cleve Moler, The MathWorks Inc., USA

Recent Advances in Rendering and Interaction for Volumetric Data in Medical Applications

Anders Ynnerman, Linköping University, Sweden

PARA 2006 Minisymposia

Stretching Time and Length Scales in Biomolecular Modelling (18 presentations)

Organizer: *Aatto Laaksonen*, Stockholm University, Sweden

Recent Advances in Dense Linear Algebra (11 presentations)

Organizers: *Daniel Kressner*, University of Zagreb, Croatia and Umeå University, Sweden; *Julien Langou*, The University of Tennessee, Knoxville, USA

CFD Applications for High-Performance Computing (6 presentations)

Organizer: *Sinisa Krajnovic*, Chalmers, Sweden

HPC Environments: Visualization and Parallelization Tools (12 presentations)

Organizers: *Anne C. Elster*, Norwegian University of Science and Technology, Norway; *Otto Anshus*, University of Tromsø, Norway

Tools, Frameworks and Applications for High-Performance Computing (17 presentations)

Organizer: *Osní Marques*, Lawrence Berkeley National Laboratory, Berkeley, USA

Grid Data Management (5 presentations)

Organizers: *Siegfried Benkner*, University of Vienna, Austria; *Heinz Stockinger*, Swiss Institute of Bioinformatics, Lausanne, Switzerland

Simulations in Geophysics and Space Physics (9 presentations)

Organizers: *Mats Holmström*, Swedish Institute of Space Physics, Kiruna, Sweden; *Kjell Rönnmark*, Umeå University, Sweden

Tools for Parallel Performance Analysis (12 presentations)

Organizer: *Felix Wolf*, Forschungszentrum Jülich GmbH, Germany

Grids for Scientific Computing (9 presentations)

Organizer: *Oxana Smirnova*, Lund University, Sweden

Simulations of Materials (12 presentations)

Organizer: *Lars Nordström*, Uppsala University, Sweden

Novel Data Formats and Algorithms for Dense Linear Algebra Computations (13 presentations)

Organizers: *Fred Gustavson*, IBM T.J. Watson Research Center, New York, USA and Umeå University; *Jerzy Wasniewski*, Technical University of Denmark, Lyngby, Denmark

Bioinformatics and Computational Biology (5 presentations)

Organizers: *Ann-Charlotte Berglund Sonnhammer* and *Sverker Holmgren*, Uppsala University, Sweden

Scientific Visualization and HPC Applications (4 presentations)

Organizers: *Matt Cooper* and *Anders Ynnerman*, Linköping University, Sweden

Software Tools for Parallel CFD Applications (7 presentations)

Organizers: *Xing Cai* and *Hans Petter Langtangen*, Simula Research Laboratory and Oslo University, Norway

Multi-scale Physics (6 presentations)

Organizer: *Mats G. Larson*, Umeå University, Sweden

PARA 2006 Speakers

The keynote, minisymposia and contributed papers that are published in the proceedings were presented by the speakers listed below (the names are in the same order as the papers appear in the Table of Contents). We refer to the PARA 2006 program for a complete listing of all presentations and speakers.

Keynote Papers

Jack Dongarra
James W. Demmel

Per Christian Hansen
Hans Petter Langtangen

Minisymposia Papers

Peter G. Kusalik
Peter Ahlström
Christophe Labbez
Mikael Lund
Mikael Peräkylä

Table of Contents

Keynote Papers

The Impact of Multicore on Math Software	1
<i>Alfredo Buttari, Jack Dongarra, Jakub Kurzak, Julien Langou, Piotr Luszczyk, and Stanimire Tomov</i>	
Prospectus for the Next LAPACK and ScaLAPACK Libraries	11
<i>James W. Demmel, Jack Dongarra, Beresford Parlett, William Kahan, Ming Gu, David Bindel, Yozo Hida, Xiaoye Li, Osni Marques, E. Jason Riedy, Christof Vömel, Julien Langou, Piotr Luszczyk, Jakub Kurzak, Alfredo Buttari, Julie Langou, and Stanimire Tomov</i>	
Large-Scale Methods in Image Deblurring	24
<i>Per Christian Hansen and Toke Koldborg Jensen</i>	
A Case Study in High-Performance Mixed-Language Programming	36
<i>Hans Petter Langtangen</i>	

Minisymposia Papers

Stretching Time and Length Scales in Biomolecular Modelling

Stretching Time and Length Scales in Biomolecular Modelling: Minisymposium Abstract	50
<i>Aatto Laaksonen</i>	
Averaged Configurations from Molecular Dynamics Simulations	51
<i>K. Gillis, J. Vatamanu, M.S. Gulam Razul, and Peter G. Kusalik</i>	
Atomistic Simulation Studies of Polymers and Water	59
<i>Erik Johansson and Peter Ahlström</i>	
A New Monte Carlo Method for the Titration of Molecules and Minerals	66
<i>Christophe Labbez and Bo Jönsson</i>	

Coarse Graining Biomolecular Systems	73
<i>Mikael Lund</i>	
Molecular Dynamics Simulation Studies on the Modulation of Vitamin D Receptor Activity by Agonists and Antagonists	82
<i>Mikael Peräkylä</i>	
Sparse Matrix Algebra for Quantum Modeling of Large Systems	90
<i>Emanuel H. Rubensson, Elias Rudberg, and Pawel Satek</i>	
A Highly Efficient <i>Ab Initio</i> Tight-Binding-Like Approximate Density-Functional Quantum Mechanical Method	100
<i>Yaoquan Tu, Lennart Nilsson, and Aatto Laaksonen</i>	
Protein Folding Properties from Molecular Dynamics Simulations	109
<i>David van der Spoel, Alexandra Patriksson, and M. Marvin Seibert</i>	

Recent Advances in Dense Linear Algebra

Recent Advances in Dense Linear Algebra: Minisymposium Abstract ...	116
<i>Daniel Kressner and Julien Langou</i>	
Parallel Variants of the Multishift QZ Algorithm with Advanced Deflation Techniques	117
<i>Björn Adlerborn, Bo Kågström, and Daniel Kressner</i>	
Parallel Algorithms and Condition Estimators for Standard and Generalized Triangular Sylvester-Type Matrix Equations	127
<i>Robert Granat and Bo Kågström</i>	
LAPACK-Style Codes for Pivoted Cholesky and <i>QR</i> Updating	137
<i>Sven Hammarling, Nicholas J. Higham, and Craig Lucas</i>	
Implementing Linear Algebra Routines on Multi-core Processors with Pipelining and a Look Ahead	147
<i>Jakub Kurzak and Jack Dongarra</i>	
Specialized Spectral Division Algorithms for Generalized Eigenproblems Via the Inverse-Free Iteration	157
<i>Mercedes Marqués, Enrique S. Quintana-Ortí, and Gregorio Quintana-Ortí</i>	

CFD Applications for High Performance Computing

CFD Applications for High Performance Computing: Minisymposium Abstract	167
<i>Siniša Krajnović</i>	

Some Experiences on the Accuracy and Parallel Performance of OpenFOAM for CFD in Water Turbines	168
<i>Håkan Nilsson</i>	

HPC Environments: Visualization and Parallelization Tools

HPC Environments – Visualization and Parallelization Tools: Minisymposium Abstract	177
<i>Anne C. Elster and Otto J. Anshus</i>	
Trusting Floating Point Benchmarks – Are Your Benchmarks Really Data Independent?	178
<i>John Markus Bjørndalen and Otto J. Anshus</i>	
CoMPI – Configuration of Collective Operations in LAM/MPI Using the Scheme Programming Language	189
<i>Espen Skjelnes Johnsen, John Markus Bjørndalen, and Otto J. Anshus</i>	
A Load Balancing Strategy for Computations on Large, Read-Only Data Sets	198
<i>Jan C. Meyer and Anne C. Elster</i>	
Automatic and Transparent Optimizations of an Application’s MPI Communication	208
<i>Thorvald Natvig and Anne C. Elster</i>	
Parallel Methods for Real-Time Visualization of Snow	218
<i>Ingar Saltvik, Anne C. Elster, and Henrik R. Nagel</i>	
Support for Collaboration, Visualization and Monitoring of Parallel Applications Using Shared Windows	228
<i>Daniel Stødle, John Markus Bjørndalen, and Otto J. Anshus</i>	

Tools, Frameworks and Applications for High Performance Computing

Tools, Frameworks and Applications for High Performance Computing: Minisymposium Abstract	239
<i>Osni Marques</i>	
Multi-level μ -Finite Element Analysis for Human Bone Structures	240
<i>Peter Arbenz, G. Harry van Lenthe, Uche Mennel, Ralph Müller, and Marzio Sala</i>	
High-Level User Interfaces for the DOE ACTS Collection	251
<i>L. Anthony Drummond, Vicente Galiano, Violeta Migallón, and José Penadés</i>	

High-Performance Graph Algorithms from Parallel Sparse Matrices 260
John R. Gilbert, Steve Reinhardt, and Viral B. Shah

A Python Module for PDE-Based Numerical Modelling 270
Lutz Gross, Ben Cumming, Ken Steube, and Dion Weatherley

COMODI: Architecture for a Component-Based Scientific Computing System 280

Epitaxial Surface Growth with Local Interaction, Parallel and Non-parallel Simulations	882
<i>Carmen B. Navarrete, Susana Holgado, and Eloy Anguiano</i>	
Data Dependence Analysis for the Parallelization of Numerical Tree Codes	890
<i>Gerhard Zumbusch</i>	
Linear Algebra	
Efficient Assembly of Sparse Matrices Using Hashing	900
<i>Mats Aspñäs, Artur Signell, and Jan Westerholm</i>	

A Web-Site-Based Partitioning Technique for Reducing Preprocessing Overhead of Parallel PageRank Computation	908
<i>Ali Cevahir, Cevdet Aykanat, Ata Turk, and B. Barla Cambazoglu</i>	
Is Cache-Oblivious DGEMM Viable?	919
<i>John A. Gunnels, Fred G. Gustavson, Keshav Pingali, and Kamen Yotov</i>	
Partitioning and Blocking Issues for a Parallel Incomplete Factorization	929
<i>Pascal Hénon, Pierre Ramet, and Jean Roman</i>	
Automatic Performance Tuning for the Multi-section with Multiple Eigenvalues Method for Symmetric Tridiagonal Eigenproblems	938
<i>Takahiro Katagiri, Christof Vömel, and James W. Demmel</i>	
Optimizing a Parallel Self-verified Method for Solving Linear Systems	949
<i>Mariana Kolberg, Lucas Baldo, Pedro Velho, Luiz Gustavo Fernandes, and Dalcidio Claudio</i>	
A Parallel Block Iterative Method for Interactive Contacting Rigid Multibody Simulations on Multicore PCs	956
<i>Claude Lacoursière</i>	
PYTRILINOS: High-Performance Distributed-Memory Solvers for Python	966
<i>Marzio Sala, William F. Spitz, and Michael A. Heroux</i>	
AMESOS: A Set of General Interfaces to Sparse Direct Solver Libraries	976
<i>Marzio Sala, Ken Stanley, and Michael A. Heroux</i>	
<i>d-Spline</i> Based Incremental Parameter Estimation in Automatic Performance Tuning	986
<i>Teruo Tanaka, Takahiro Katagiri, and Toshitsugu Yuba</i>	
Simulation Environments	
A High Performance Generic Scientific Simulation Environment	996
<i>René Heinzl, Michael Spevak, Philipp Schwaha, and Siegfried Selberherr</i>	
NestStepModelica – Mathematical Modeling and Bulk-Synchronous Parallel Simulation	1006
<i>Christoph Kessler, Peter Fritzson, and Mattias Eriksson</i>	

FLECS, a Flexible Coupling Shell Application to Fluid-Structure Interaction 1016
Margreet Nool, Erik Jan Lingen, Aukje de Boer, and Hester Bijl

Algorithms and Applications for Blue Gene/L

New Scalability Frontiers in *Ab Initio* Electronic Structure Calculations Using the BG/L Supercomputer 1026
Constantine Bekas, Alessandro Curioni, and Wanda Andreoni

A PAPI Implementation for BlueGene 1036
Nils Smeds

Scientific Computing Applications

Numerical Simulation of 3D Acoustic Logging 1045
Victor I. Kostin, Dmitry V. Pissarenko, Galina V. Reshetova, and Vladimir A. Tcheverda

An Improved Interval Global Optimization Method and Its Application to Price Management Problem 1055
Bartłomiej Jacek Kubica and Ewa Niewiadomska-Szynkiewicz

Optimizing Neural Network Classifiers with ROOT on a Rocks Linux Cluster 1065
Tomas Lindén, Francisco García, Aatos Heikkinen, and Sami Lehti

A Model of Small-Scale Turbulence for Use in the PPM Gas Dynamics Scheme 1074
Paul R. Woodward and David H. Porter

Scientific Computing Tools

Mapping in Heterogeneous Systems with Heuristic Methods 1084
Juan-Pedro Martínez-Gallar, Francisco Almeida, and Domingo Giménez

The parXXL Environment: Scalable Fine Grained Development for Large Coarse Grained Platforms 1094
Jens Gustedt, Stéphane Vialle, and Amelia De Vivo

Parallel Search Algorithms

Performance Analysis of Two Parallel Game-Tree Search Applications 1105
Yurong Chen, Ying Tan, Yimin Zhang, and Carole Dulong

Implementation of a Black-Box Global Optimization Algorithm with a Parallel Branch and Bound Template	1115
<i>Raimondas Čiegis and Milda Baravykaitė</i>	
Parallelization Techniques for Tabu Search	1126
<i>Jacek Dąbrowski</i>	
Peer-to-Peer Computing	
<i>TreeP</i> : A Self-reconfigurable Topology for Unstructured P2P Systems . . .	1136
<i>Euloge Edi, Tahar Kechadi, and Ronan McNulty</i>	
A Middleware for Job Distribution in Peer-to-Peer Networks	1147
<i>Thomas Fischer, Stephan Fudeus, and Peter Merz</i>	
Mobility and Security	
Mobile Agents Self-optimization with MAWeS	1158
<i>Emilio Pasquale Mancini, Massimiliano Rak, Salvatore Venticinque, and Umberto Villano</i>	
Algorithms for Single-Chip Multiprocessors	
Performance Impact of Resource Conflicts on Chip Multi-processor Servers	1168
<i>Myungho Lee, Yeonseung Ryu, Sugwon Hong, and Chungki Lee</i>	
An Implementation of Parallel 1-D FFT Using SSE3 Instructions on Dual-Core Processors	1178
<i>Daisuke Takahashi</i>	
Author Index	1189
